Aviation Carpet

Why Woven Carpet?

When you choose woven carpet, you receive the most time-honored form of carpet making in the history of the world. Smart, cost- and environmentally-conscious aviation specifiers and designers are putting the legendary durability of woven carpeting to work today.

Woven nylon construction is inherently stronger than any other carpet construction. Its longer life cycle means your investment stretches farther, offering a significant cost savings over time. It's cost savings you can feel good about. Woven carpet saves the environment, using less nylon in its construction, and performing 300% longer than other carpet constructions before needing to be replaced. That means less energy needed to make replacement carpet, less energy needed to haul it and exchange it. It means less carpet in our landfills. Woven carpet is as durable as it is beautiful, and Mohawk is America's oldest carpet weaver, operating the world's largest weaving plant and offering the broadest array of weaving types.

In addition, all of our woven carpets qualify for the Mohawk Group's carpet recycling program, ReCover. All Mohawk Group Air carpet can be processed into raw material for other products. Affiliated reclamation programs have helped keep millions of pounds of used carpet out of landfills, thus reducing the impact on our environment.

Nylon vs. Wool Carpet

100% Compliant Meets all Airbus, Boeing and FAA requirements.

More Durable Nylon carpet outwears wool by as much as 6 to 1 which means fewer reinstallations per year.

More Colorfast Nylon outperforms wool 3 to 1 for colorfastness.

Cheaper Initial cost and total cost of ownership of our nylon carpet per square yard is significantly lower than comparable wool products.

Lighter Mohawk Air carpet is typically far lighter than comparable aircraft carpets. Reduced flying weight means fuel savings that add up over the long life of the carpet.

Faster Receive your nylon carpet in half the time of wool production.

Easier to Maintain Mohawk Air carpet repels stains and dries quickly when cleaned.

Higher Quality Mohawk Air carpet resists shrinking, will not smell or mildew when wet, and retains permanent built-in static protection.

Fewer nylon re-installations mean greater savings over time

How do I get started?

1 Select a Pattern There are three ways to determine the design of your aviation carpet:

- Select one of our existing patterns online
- Work with our Design team to create your own unique look using our easy to use, online design resources
- Supply your own proprietary design

2

Add Color Whether you're designing your own carpet or selecting one of our existing patterns, you can create your own look through color. With over 250 standard dye colors and several metallic hues to choose from, your creative possibilities are virtually limitless. If one of our colors doesn't fit the bill, we can create a custom dye to ensure you get just the right look. And using our online design tools you can re-colorize your pattern instantly, to be sure you get just the look you were searching for.

3

Order It Now that the creative process is complete and you've received your sample, it's time to order. Here is where your Mohawk Group Air rep steps in. Your rep will make sure you get the right product, at the right price, *and* that it arrives where you need it, when you need it.

Mohawk Group Air is the global leader in aircraft carpeting. Our carpets deliver unmatched safety and durability offering our discerning customers superior value, proven performance and lowest cost of ownership.

Why choose Mohawk Group Air?

Safety All Mohawk Group Air nylon woven carpets meet Airbus, Boeing and FAA safety requirements.

Speed Our computerized looms weave quality carpet at nearly twice the speed of other industry looms.

Reliability Mohawk Group Air is part of a \$5.6 billion, fortune 500, worldwide leader in floor covering products – Mohawk Industries, Inc.

Quality Our computerized finishing line and new latex applicator allows more precise applications of our next generation AkroBak latex backing. That means faster service that meet your exacting quality standards.

Expertise We've been manufacturing and distributing carpet for over 175 year and we are the world's leading manufacturer of woven carpet.

Sustainability One out of every four PET bottles recycled in North America becomes Mohawk carpet.
