

Chloraguard[®]

for better bleach resistance

Advanced Generation Bleach Treatment for PDI Carpets
(Broadloom and Tile)

HOTELS • SENIOR LIVING
MULTIFAMILY
CONVENTION CENTERS
CONDOMINIUMS
HEALTHCARE • THEATERS
CORPORATE • CASINOS

Perfect for guest rooms and other hotel interiors, senior living, healing spaces, workplace installations and any other commercial environment where bleach-based cleaning agents may be used around printed carpeting.

IDEAL CHOICE FOR INNOVATIVE PERFORMANCE

Chloraguard is the ideal choice for innovative performance. By providing full treatment bleach protection for Precision Dye Injection (PDI) carpeting, Mohawk Group's **Chloraguard** technology allows printed carpets to be used where previously only solution-dyed fiber would meet specifications. Chloraguard offers contract designers the color and pattern flexibility of printed carpeting and the peace of mind of knowing their client's soft flooring is protected.

We applied a 10% bleach solution to two identical samples. After following the maintenance guidelines, color loss is prevented on the samples enhanced with Chloraguard.

BLEACH with PDI on
Conventional Nylon

Chloraguard Enhanced Nylon

PERFORMANCE THAT LASTS: SEEING IS BELIEVING

Whether it's an accidental spillage of cleaning solution or the occasional wet traffic from a pool area into a corridor, Chloraguard protects your investment for as long as your carpet is in use.

- Advanced bleach resistance for printed carpeting
- Exceptional stain protection
- Peace of mind against accidental spills
- Resistance of up to 10% solution of standard bleach
- Industry-leading 15-year warranty*

* Please refer to Mohawk Group and Durkan warranty guidelines for additional information.

Chloraguard passes AATCC 196 and resists color loss when solutions of common household bleach (no greater than 10%) are used and Mohawk Group's maintenance guidelines are followed:

- Chloraguard is incorporated in the dyeing process and applied topically in post-production for complete protection of the carpet.
- Mohawk Group and Durkan offer Chloraguard technology on ALL base grades with only a 133-square-yard-minimum order required for custom carpets.
- If this technology is to be utilized, the customer must specify Chloraguard from the start so the strike-off can be ordered with the bleach-resistant protection.
